

ROAD TRIP:

The Eastern Sierra of California has long been an iconic destination. This larger-than-life landscape of deserts and mountains, alpine forests and spectacular waterfalls, ranks as one of the most photographed regions in the USA. A land of natural extremes, the Eastern Sierra also holds historical and cultural treasures, with human tales as high and low as its altitudes. Now, for those ready to go the distance, there

The highest, lowest, hottest, oldest, wildest 555 miles in America.

is a route that will take you to the furthest extremes of this spectacular part of America.

The E.S.T. is a linear route, spanning over 555 miles, from Death Valley at -282 feet below sea level to the towering peaks of Tioga Pass at 9,943 feet above sea level. You'll want to prepare your vehicle and your senses too, for everything from desert heat to icy mountain mists.

driest/lowest/hottest

DEATH VALLEY – America's Hottest, Driest and Lowest National Park

The extreme nature of this massive desert basin must be experienced to be believed. See one of the largest salt pans on Earth with scenery that would look at home on a desert planet from Star Wars. Yet, despite its name, this area hosts a diversity of life, from lush oases to vast fields of wildflowers that appear after one of its rare rainstorms. You could also add another 'est' to its title, as the **Largest National Park in the Lower 48**. **Open:** Year-round

Traveler Tip: Temperatures can exceed 120 degrees Fahrenheit here in the summer. Bring extra water and plan for extreme heat.

MT. WHITNEY – The Highest Peak in the Contiguous US

With spires that rise like dragon's teeth from the horizon, reaching 14,505 feet, Mt. Whitney looks as unassailable as a medieval fortress. Yet the Whitney Portal Road welcomes you, with views that make it one of the most scenic drives in California. For dedicated mountaineers, there is more than one route to the summit of Mount Whitney, the tallest peak in the contiguous United States. (The route from Whitney Portal is a little under 22 miles round trip, with an elevation gain of 6,134 feet). More casual road-trippers may just want to stop for pancakes at the Whitney Portal Store and Café – no doubt, some of the fluffiest (open in the summer). **Open:** June-October depending on snow pack and weather conditions.

Traveler Tip: Whitney Portal Road closes in winter due to snow. You can see Mt. Whitney year-round from the Eastern Sierra Interagency Visitor Center located at the junction of Hwy US 395 and State Route 136 just south of Lone Pine. A permit is required to hike Mt. Whitney.

ALABAMA HILLS – The Wildest West

If you’ve watched any old western movies, you may have already seen some of the Alabama Hills. This National Scenic Area is home to rounded rock formations, tawny Sierra hills, and hundreds of natural stone arches. The Alabama Hills are a natural playground for hikers, climbers, landscape photographers, plein air painters and nature lovers. **Open:** Year-round

Traveler Tip: Stop by the Museum of Western Film History located in the town of Lone Pine to see artifacts from the many movies filmed here over the years. 701 S Main Street, Lone Pine, CA 93545 Lpmuseum.org

MANZANAR NATIONAL HISTORIC PARK – The Truest View

If this road trip feels remote to you today, imagine how it must have felt for Japanese families relocated here in 1942. The Manzanar War Relocation Center was one of ten camps at which Japanese American citizens and resident Japanese aliens were incarcerated during World War II. Located between the towns of Lone Pine and Independence, Manzanar is one of the best preserved of these camps. **Open:** Year-round

Traveler Tip: You can explore the site on foot or reserve a free ranger-led program for your group’s visit (subject to availability).

ANCIENT BRISTLECONE PINE FOREST – The Oldest Living Thing

Bristlecone pines grow in the poorest soils and harshest environments, reaching out to the sky from rocky bluffs and outcrops just below the tree line. Some of these gnarled and twisted trees are over 4,700 years old—making them the oldest living things on the planet. Trails from the Visitor Center at Schulman Grove lead you past specimens of varying age and size, with views overlooking the Owens Valley. **Open:** Typically late April to late October, depending on snow and weather conditions.

Traveler Tip: Beyond Schulman Grove is Patriarch Grove— home of the world’s largest Bristlecone Pine, the Patriarch Tree.

PAIUTE SHOSHONE CULTURAL CENTER – The Earliest Communities

The Owens Valley is home to cultures as old as the Bristlecone pines. A museum and cultural center that serves the community and safeguards its history, Owens Valley Paiute Shoshone Cultural Center offers insights into the Nuumu (Paiute) and Newe (Shoshone) nations that originally inhabited the area. **Open:** Year-round

Traveler Tip: Check their website for seasonal events happening monthly in collaboration with local tribes.

DEVILS POSTPILE NATIONAL MONUMENT – The Strangest Structures

Devils Postpile is one of the best examples of natural basalt columns in the world, some reaching as high as 60 feet. Besides these eerie natural stone towers, the Devils Postpile National Monument offers varied opportunities for recreation, from hiking to horseback riding and sightseeing to wildlife and waterfall viewing at Rainbow Falls. Open: May-October

Traveler Tip: A mandatory shuttle bus into Reds Meadow/Devils Postpile leaves Mammoth Mountain Main Lodge continuously throughout the day.

MONO LAKE – The Saltiest Swim

The largest natural lake in California, Mono Lake is an amazing 2.5 times saltier than the ocean and is one of the western hemisphere's oldest lakes. Mono Lake is one of the most studied—and photographed—bird sanctuaries in North America and is also a beautiful ever-changing oasis of light and color. Photographers love its jagged snow-capped mountain reflections and the eerie spires, with the best displays located at the South Tufa Reserve. Open: Year-round

Traveler Tip: Drop by one of the two visitor information centers in Lee Vining and find out how Mono Lake's mystical-looking limestone tufa towers are formed and how the lake was saved.

BODIE STATE HISTORIC PARK – The Loneliest Town

In 1880, the town of Bodie was home to some 10,000 miners, store owners, gunfighters, robbers and people from every part of the world. Now it's a ghost town of weathered buildings, rust and faded dreams. Bodie remains impressively well preserved. You can book ghost walks and tours, or just spend hours wandering its streets, peering in windows and listening for the past.

Open: Bodie is open year-round, however vehicle access on Hwy 270 into the park is open April-November, depending on weather and snow conditions.

Traveler Tip: Daily tours of the Stamp Mill may be offered for a small fee per person. Visit the Museum for current information and to register.

**YOSEMITE NATIONAL PARK –
The Grandest Landscape**

For centuries, people have tried to put into words the majesty that is Yosemite. From epic spring waterfalls to towering granite icons like El Capitan and Half Dome, to giant sequoia groves, the whole vista seems designed to make humans feel small. Open: Tioga Pass Hwy 120 (the east entrance) is open May-November depending on snow and weather conditions. Yosemite National Park is open year-round.

Traveler Tip: Plan to arrive early! Parking and traffic can be an issue, plan to arrive at your destinations before 9 am. Better yet, take a YARTS tour-style bus into Yosemite without a worry about traffic or parking. Purchase advance tickets at YARTS.com.

(2090 372-0200 • Nps.gov/yose)

**TRAVEL
TIP**

Snow storms close many roads in the White Mountains and the Sierra. The access roads to the Bristlecone Pines, Devils Postpile, Bodie, John Muir Trail, Pacific Crest Trail and Yosemite are **CLOSED** in winter.
